SCIENTIA VIRTUSQUE

Grade 8 Science

Dr. Day

Week 18: January 16th - 19th, 2018

This week we will master the concept of isotopes by discovering what types of isotopes of “pennium” occur naturally. After finishing this lab we will continue to practice Lewis dot structures, and further work to understand ionic bonding.

Homework: Please see the live updating Homework link under Resources on my teacher page

Tuesday: No homework

Wednesday: Complete the atomic structure review handout

Thursday: No homework
