

Health Research Live!

Communities and researchers discussing health priorities.

Join us for community discussions on health research being conducted in New Hampshire and Vermont. Hear from scientific researchers, community members, and organizations—all providing their perspectives on important health issues. Be part of the conversation to influence health research being conducted in your local community.

These events are free and open to the public. We especially encourage parents to attend.

10/23

Healthy eating during childhood

RSVP: tinyurl.com/MontshireHealthyEating
